

Plan4Safety Request Form

The Transportation Safety Resource Center (TSRC) at Rutgers Center for Advanced Infrastructure and Transportation (CAIT) can conduct crash analysis for agencies/organizations/companies that need it for legitimate purposes (grants, engineering/planning/enforcement projects, etc).

Consultants who need crash analysis are welcome to coordinate with TSRC to have someone come to CAIT to gather all their needed information.

Step 1	Step 2	Step 3**
Determine analysis you need; if you are unsure about the types of information, please visit NJDOT's website, under 'Crash Records'. Personal information, crash diagrams and narratives are not yet available.	Complete this form. Please be VERY specific about your needs (years, location, type, etc). Generalized requests will be sent back for clarification and will add additional time to the process. ALL fields must be filled in for us to easily communicate with you.	Return completed form to Mitra Neshatfar at mitranes@rutgers.edu . A completed form does not guarantee approval of request. TSRC will communicate with requesting parties on their request status.

Due to staff availability and time, TSRC requires **10 business days to complete an analysis.
